

ANIMAL RESCUE SERVICES

Thanks to generous donations from the Friends of HAWS fundraising group and an anonymous donor, HAWS' Animal Rescue vehicle fleet has grown from 2 vehicles to 4 vehicles. This enables us to respond more quickly to calls both during the day and at night. Our current building accommodates only two interior parking spaces.

Specific expansion improvements for HAWS' Animal Rescue services include:

- A dedicated room for exotics and domestic livestock (potbellied pigs, ducks, turkeys, chickens) with floor drains to aid in cleaning. This will prevent them from being housed in the same run used for dogs or in the wildlife area.
- Interior space for the delivery of incoming stray animals, making escape less likely.
- Indoor parking for a third vehicle (the 4th vehicle is usually kept with our emergency overnight responder personnel).
- Storage for our lawn tractors and snow removal equipment.
