

STAFF AND VOLUNTEER ACCOMMODATIONS

Our current staff consists of 17 full time and 26 part time team members.

More than 41,000 hours of service were performed by our volunteers in 2014. Most of these hours were spent in hands-on animal socialization activities. Our Volunteer Coordinator is now a full time position.

We expect our staffing numbers to grow in our Spay / Neuter clinic, the Education Department and the Behavior Department.

Four office work areas will address the staff needs. Eliminating the overlapped usage of training and education rooms will aid with the difficulty in scheduling activities and programs.

Specific improvements planned for Staff and Volunteer accommodations:

- The current SNIP clinic will be used for expansion of the lounge and lunch area, while adding an additional storage area.
- Moving the SNIP administration office will add 3 work stations.
- The new Behavior Department work room, while allowing for small classes, consultations, evaluations and behavior modification, will also free up other rooms, making them available for children's education programs and animal socialization activities. An additional office work area is included in that space.
